Technical – Management – Strategic Consulting Services
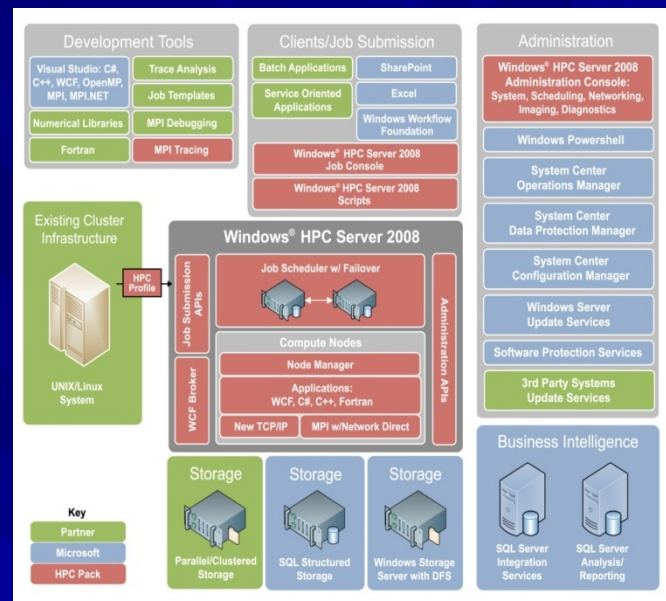

MTT Associates Professional Services can help you plan and build a robust IT infrastructure designed for maximum reliability, scalability, and performance. Our consultants specialize in deploying IT infrastructure to get the solutions up and running quickly and smoothly on various platforms. Our services encompass the expert skills, advanced technologies, and proven process(es) required to build a high performance IT infrastructure for the success of your enterprise's wide system.

Application Support Services - We will provide you with experienced Software Quality Assurance, Change Management and Version Control personnel. Establish a formal test strategy and help develop the Test Plans and Procedure. Coordinate test-planning activities, manage test effort, and coordinate testing related change control process for your Application environment using various automated testing tools.

Technology Assessment Services – We will help you find answers to technical issues during your implementation. It is a collaborative, focused evaluation of your technical infrastructure and technical project plan as they relate to your implementation plan and approach, ensuring that the system configuration and settings are optimal.

Linux, Unix and NT System Administration Services –
We will provide you with experienced Unix (HP/UX, Solaris, AIX) and NT administrators for the various system environment. Our consultants work onsite with your technical staff to build a technical environment, with well-documented standards. Assist in the System Administration, System Capacity Planning, Disaster Recovery Planning, System Backup & Recovery Procedures, System Performance Monitoring and Tuning (Unix, Linux, NT, Apache, BEA WebLogic and IBM WebSphere).

Database Administration Services – We will provide you with experienced database administrators for each of the various database platforms (Oracle 11g, MS/SQL Server 2005 / 2008, and DB2 UDB) on your various system environment. Our consultants work with your technical staff to build a technical environment, with well-documented standards. Assist your staff w/ Database Administration, Design, Backup, Recovery, Performance Tuning and Capacity Planning of the various system environments.

Information Assurance Services- We can assist your organization in protecting it most vital asset (your data), by providing security management, certification and accreditation, security policies and procedures. Information Security helps clients achieve their security goals by understanding, prioritizing, and mitigating their security-related business risks with our comprehensive set of information protection services. MTT Associates solutions support both established and new service offerings, by providing the required underlying privacy and security as well as compliance with legal and regulatory rules, such as the **Gramm-Leach-Bliley Act** *(GLBA)* and the **Health Insurance Portability & Accountability Act** *(HIPAA)* and *Federal Information Security Management Act (FISMA), etc.*

Enterprise Warehouse Management – We provide you with experienced administrator with data warehouse and data mart design experience in data transformations and project management – reports, data mining, data splicing, data cleansing and data extraction using Informatica PowerMart system environment. Develop, test and implement Informatica mapping and sessions which populate dimension and fact tables.

Project Management Services – We will provide you with a Project Management resource with experience including development of work estimated, budgets, timelines, manage large teams, track progress and deliverables by managing scope and milestones, develop tactical work plans just to name a few.

E-Support Services – We will provide you with remote support in the following areas: Networking, Database Administration, N-Tier Architecture Support, System Administration, NT and Unix System Administration. This will ensure that your system environment is optimally configured for your business needs.

Improve IT Value and Efficiency

MTT Associates' Technical, Strategic and Management Consulting Services can help your organization achieve:

Better Alignment Of IT And Business	Improved Business Responsiveness	Enhanced IT Credibility	Rich Understanding Of Your IT Architecture	Reduce IT Expenditures
By integrating IT strategy with business strategy, this will increase the value that IT offers to the enterprise through greater innovation risk management and operational integration.	With agile IT Architecture, applications can respond faster and more effectively to changes in business process coming within the organization or from the marketplace.	Raise the credibility throughout the organization by consistently delivering on time and on budget, meeting service level agreements, and contributing to financial performance.	We give you an effective tool for making the right decision about your architecture and for communicating to stakeholders and management the precise state of your IT environment.	Effective reuse of IT assets helps realize sustainable cost reductions from your IT functions and makes resources available to deploy toward growth initiatives.
