Global Combat Support System —Air Force (GCSS-AF)

GCSS-AF provides a component-based Reference Architecture Framework that serves as the Integration and Application Framework Layers for GCSS-AF functional capabilities consistent with the Defense Information Infrastructure Common Operating Environment (DII COE), the Joint Technical Architecture — Air Force (JTA-AF), and based on commercial open standards. The GCSS-AF Reference Architecture Framework also provides common interfaces for those functions that either directly or indirectly support Command and Control (C2) or share information with C2 Systems. The Indefinite Delivery/Indefinite Quantity (ID/IQ) Ordering Process provides a timely and assured method to acquire software products and maintenance services from the GCSS-AF contract. The ordering period for Services ends August 2008 and ordering period for Products ends August 2011.

Program Manager: Lt Col David Gindhardt, (781) 377-7507

Contracting Officer: Ms. Marie Amos, (334) 416-3234

Lockheed Martin Corporation Contract #: F01620-96-D-0004

Independent Test and Evaluation

This contract provides for systems and security analysis and related technical services to assist in testing, evaluation and security accreditation and certification.

Multimax Corporation Contract #: FA8771-04-D0003-0019

Enterprise Architecture Support

This contract provides technical expertise of hands-on Enterprise architects in support of ELSW SPOs.

BTAS, Inc. Contract #: F01620-03-D0002 (Task Order #0009)

CGSS-AF Test Development Range Support

This contract provides a GCSS-AF compliant environment for government and contractor IT developers and integrators to test GCSS-AF applications prior to implementing to GCSS-AF production.

BTAS, Inc. Contract #: F01620-03-D0002

System Engineering Support

This contract provides advisory and assistance services to obtain technical expertise to support 643rd ELSS engineering disciplines IAW 554th ELSW.

Oasis System Inc. Contract #: FA8771-06-F8005

Engineering Process and Policy Support

This contract provides A&AS support to development, maintenance, training and monitoring of implementation and operation of 554 ELSW-level systems. These include the engineering and acquisition policies, standards, instructions and processes that implement HHQ policies governing acquisition, development, integration, test, fielding & sustainment of 554 ELSW IT systems and services.

BTAS, Inc. #: FA8771-06-F8000
