

Charnita Allen, Vice President of Federal Operations

Ms. Allen is a graduate of the University of Virginia with a Bachelor's Degree in Civil Engineering and a concentration in systems engineering. She has more than 10 years of professional experience that includes management and systems engineering for the intelligence community and transportation community.

During her career, Ms. Allen has managed numerous projects, contracts and personal. She has worked the customer to assist with identifying resource needs, negotiating rates, and establishing future relationships for additional opportunities. As the VP of VA Operations with MTT Associates, Ms. Allen is a key member of the management team. She assists with identifying and resolving customer issues, providing immediate feedback to customer concerns. She is the primary point of contact for all MTT Associates projects with the Intelligence community. She provides both management and systems engineering support to accomplish the customers' mission and goals.

Ms. Allen's experience as a systems engineer has allowed her to be a key component in various projects such as developing the National ITS Architecture, transitioning technology into a secure environment, and implanting adult learning principles while training other engineers. Her Systems Engineering experience includes designing, implementing and maintaining the National ITS Architecture and supporting the intelligence community. She has supported the development of various ITS Standards, regional ITS Architectures throughout the United States. She served as primary point of contact for changing technology and incorporating new technology into secured environments. She has also assisted programs with developing and implementing configuration management procedures, developing and updating web pages, managing databases of technical issues, maintaining documentation for process improvement as well as established training programs to implement process improvement, and provide software configuration management support. She is an ISO 9001 and SEI CMMI certified auditor and assessor.
