CONVERGENCE

Geomagic User Group Conference  
February 20-23

Sheraton Imperial  
Research Triangle Park  
North Carolina

the magic of making it simple™

launch new  
**ideas**  
at Convergence  
2007

Dear Friends:

It is my pleasure to invite you to Convergence 2007, the first international Geomagic User Conference.

We are excited to have Eileen Collins, the first female commander of a NASA space shuttle, as a keynote speaker. You'll hear her incredible story of Discovery mission STS-114, in which a 3D scanner and Geomagic software were used to detect and repair tile damage, ensuring the safe return of the shuttle.

My keynote is titled "A Picture of The Future: A Holistic Vision of the Convergence of Data and Market Trends." It will outline how we can work together to redefine key industries and share the fruits of a rewarding future.

We have an impressive line-up of speakers who have been on the front lines of revolutionary changes in the way products are designed, engineered, inspected and maintained. They will share their knowledge, challenges, successes, new ideas, and processes.

Convergence 2007 is also your opportunity to meet the Geomagic software team and express your product wishes – we promise to listen and respond. Throughout the conference, you'll have opportunities to catch up with old colleagues, make new friends, and exchange ideas.

My hope is that Convergence 2007 will reignite your sense of delight in connecting dots to form limitless shapes. If inspiration could be captured in a handwritten note, my note to you would say: It will be a wonderfully memorable time. Come and enjoy!

On behalf of the Geomagic team, I thank you for your ongoing trust and support, and hope that you will be able to share a few days with us. I am looking forward to seeing you February 20-23, 2007 in Research Triangle Park, North Carolina.

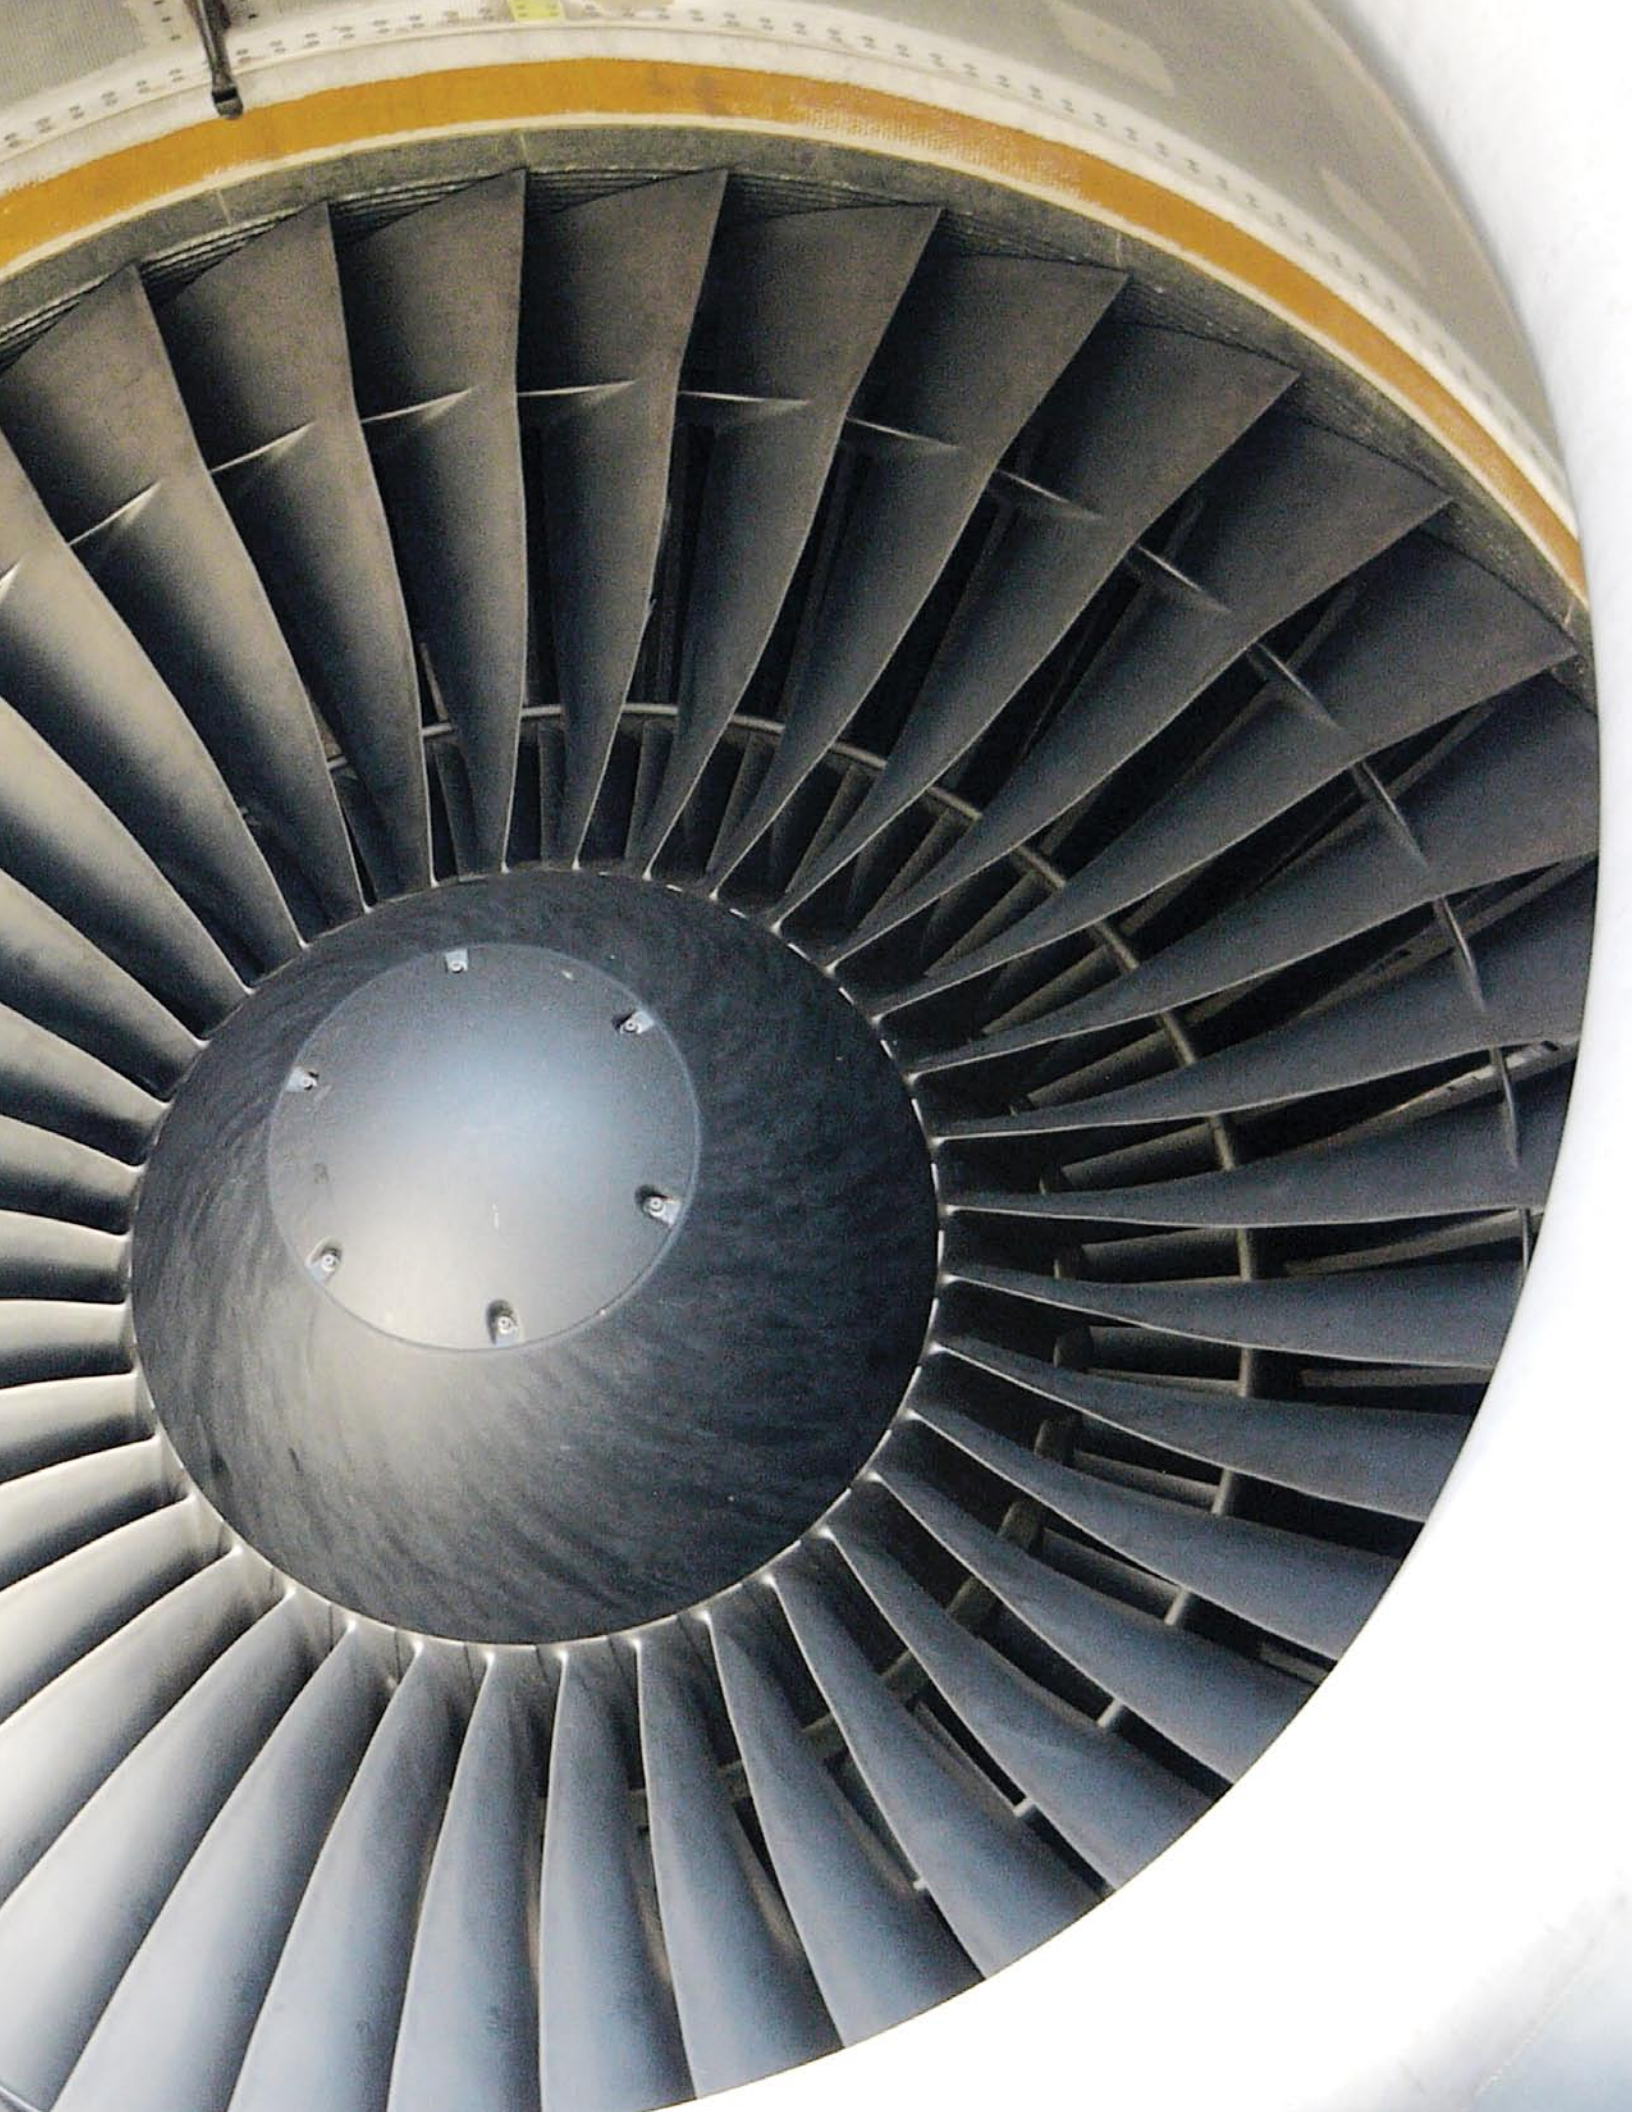

Sincerely,

Ping Fu

---

President & CEO  
Geomagic, Inc.

#### Keynote Speakers:

**Col. Eileen Collins**, the commander of the Space Shuttle Discovery STS-114 mission, shares how Geomagic software technology played a critical role in ensuring the safe return of the astronauts on the "Return to Flight" mission by enabling NASA to capture, recreate and analyze digital models used to repair the shuttle's tiles while Discovery was in orbit. Learn more about Col. Collins' inspiring life in her keynote titled **"Leadership Lessons from Apollo to Discovery"**.

As the first woman to pilot and command an American spacecraft, she has led an inspiring life of adventure, leadership, and achievement. Recognized as one of America's most admired women, she is now sharing her experiences as a test pilot, astronaut, and space flight commander with audiences around the world. Collins achieved her dream of becoming an astronaut in July 1991. She flew on her first Shuttle mission, STS-63 Discovery, in February 1995, as the first woman ever to pilot a Space Shuttle. She also served as pilot on her second Shuttle mission, STS-84 Atlantis, in May 1997. In July 1999, she achieved another milestone by becoming the first woman ever to command a Shuttle mission, STS-93 Columbia. She flew her final NASA mission as commander of STS-114 Discovery in July 2005. Over the course of her four Shuttle flights, she logged over 872 hours in space.

#### Join Us At Convergence 2007

Register now at [www.geomagic.com/convergence2007](http://www.geomagic.com/convergence2007). You do not want to be the only Geomagic user to miss the conference. Equip yourself with the right tools. Join the Geomagic community and align yourself for success.

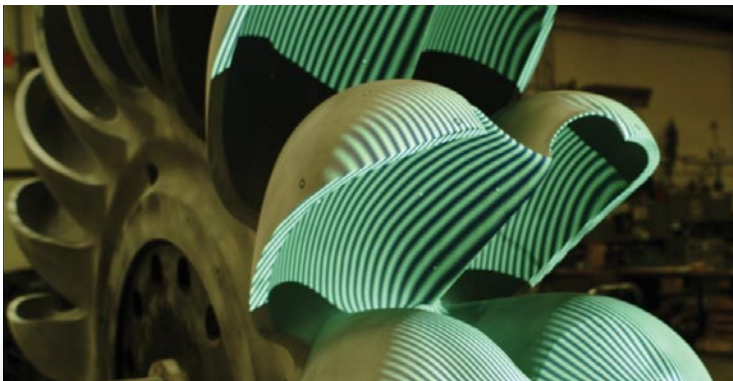

- You are already valuable to your company; increase your skill set and your value will reach unbelievable heights.
- Keeping up with technology is not a luxury, it is critical for your company to be competitive.
- Do you have a unique project that requires specific, advanced techniques? If so, we are on-hand to help.
- Reducing time to market and lowering overall costs are among only a few of the goals you will surpass with a complete understanding of the latest features of Geomagic products.

You thought business was good now. Just wait until you start practicing what you learn at Convergence 2007.

**Ping Fu**, CEO and President of Geomagic, kicks off the conference with her thoughts on the industry, the vision for the future and the direction of Geomagic. Her keynote is titled **"A Picture of The Future: A Holistic Vision of the Convergence of Data and Market Trends"**. Find out about the trends and advances in DSSP and its key application areas that include computer aided inspection and digital reconstruction and reverse engineering.

Before starting Geomagic, Ms. Fu was Director of Visualization at the National Center for Supercomputing Applications, where she initiated and managed the NCSA Mosai software project that led to Netscape and Internet Explorer. She has more than 20 years of software industry experience in database, networking, geometry processing, and computer graphics. Ms. Fu has received numerous awards for her management achievements, including the Ernst & Young Entrepreneur of the Year for the Carolinas, worldwide "Fast 50" executive by *Fast Company* magazine, *Entrebizneur* of the Year by *Business Leader* magazine, and business woman of the year by *Triangle Business Journal*. Most recently, she was named Entrepreneur of the Year by *Inc.* magazine, the leading publication for American entrepreneurs. **Learn about emerging developments and future trends from Ping Fu at Convergence 2007.**

## Special Events

### Opening Reception

#### Solutions Center

Tuesday, February 20th • 5:00-8:00 pm

Geomagic invites you to the Convergence 2007 Opening Reception. Held in the Solutions Center, this event will give you a sneak preview of what's in store for the days ahead, while enjoying a relaxing evening networking with your peers. Start the conference off right by joining Geomagic and Geomagic Alliance Partners for hors d'oeuvres, drinks and great conversations.

### Keynote Luncheon

#### Ballroom

Wednesday, February 21st • 12:00-1:00 pm

Convergence Keynotes, Col. Eileen Collins and Ping Fu will be joining everyone for lunch in the ballroom. This will provide attendees an opportunity to meet and talk with them one-on-one. It is also an opportunity to come together and share ideas with fellow attendees and Geomagic experts.

### Geomagic Casino Royale: A 10-Year Anniversary Celebration

#### Ballroom

Wednesday, February 21st • 6:00-9:00 pm

Join Geomagic as we celebrate a successful 10 years of business at the Geomagic Casino Royale. You are guaranteed a fun-filled evening of dinner, drinks, and placing bets at the Geomagic Casino Royale. Relax after a busy day and enjoy the company of fellow Geomagic users.

CREATING THE FUTURE

### Solutions Center

#### Exhibit Hall

#### Networking Breaks

The Solutions Center will be open during all breaks as a gathering place to see the latest technology from Geomagic partners, exchange ideas and, of course, enjoy refreshments. Exhibitors will have the latest measurement systems on display and be on-hand to answer all your questions.

### Golf Outing

#### Friday, February 23rd • Morning

Join us for a day of golf. What better way to end your conference than with 18 holes of golf?

## Special Offering

Just for Convergence 2007 attendees, a two-day advanced Studio 9 class will be offered. It will take place two days prior to Convergence, February 19-20, 2007. The regular fee for the Advanced Studio 9 class is \$1200, but as a Convergence 2007 attendee, you can register for only \$800. Space in the class is limited and is on a first come, first served basis. Maximize your time with the Geomagic experts.

### Featured Speakers

Customize the conference according to your needs. Multiple tracks based on industry and applications are available each day. Geomagic customers that are presenting include ADC, Advanced Simulation Technology, Inc., Benét Laboratories, Capture 3D, CSI Inspection, Direct Dimensions, GKS Inspection Services, Howmet, Quick Furniture, Schneider Electric, ShapeGrabber, UMass Amherst, and more. Visit our website for an up-to-date list of speakers.

# CONVERGENCE 2007

## Geomagic® User Conference

**Where professionals, technology and leadership converge.**

### **About the Conference**

Convergence 2007 brings together Geomagic software users from around the world to share knowledge and exchange ideas and best practices. Celebrate with us as Convergence 2007 marks the company's first decade in business as the worldwide leader in technology for DSSP. Our goal is to provide you with the training, technology trends, and a wealth of business contacts to enable you and your company to exceed all expectations for the rest of the year.

### **Apart From the Rest**

Breakaway, engage your mind in the convergence of space and earth, models and parts, experts and developers.

- Maximize the value of the technology you use each day
- Learn the latest from the experts who define and apply DSSP
- Network with the Geomagic technology experts and developers
