

IT SOFTWARE QUALITY ASSURANCE and MANAGEMENT

Our **IT Software Quality Assurance and Management** is more than simply trying out the software to make sure it works. Rather, it is guaranteeing the integrity of your mission critical business systems. There are many aspects of Software Quality Assurance including Risk Management, Risk Mitigation and Testing. Testing requires careful planning, a controlled environment, measurable and repeatable test criteria, and the latest advances in automated scripting techniques. We're experts at ensuring that your mission critical systems perform as expected. Quality means satisfying or exceeding the customers expectations.

Increase the Reliability and Predictability of your Technology Investment

The success or failure of software implementations can greatly impact your operations and profitability. That's why we design our IT Software Quality Assurance and Management approach to increase the reliability and predictability of your software, helping to increase your return on investment.

Our Service Offerings:

We focus on a strategic approach to quality assurance across the entire software development life cycle. We customize a solution tailored to your specific business needs based on the best tools and methodologies available according to industry standards.

Test Planning and Implementation - We specialize in all phases of testing throughout the software development life cycle. Including transforming business requirements into usable test scenarios that will deliver a quality customer experience. We focus on the integrity of your mission critical business systems from the requirements stage to production delivery.

Manual and Automated Testing - We use State of the Art Methodology and software to accommodate your testing needs. We also specialize in customized solutions for specific testing that best fits your needs, which, establish precise measurement criteria and standards to successfully audit and verify your procedures across the SDLC.

Performance, Load & Stress Testing - Our proven track record of designing, developing and executing performance testing, load testing, scalability testing and stress testing. We ensure applications will perform satisfactory for the end user experience and according to your growth projections. We specialize in identifying bottlenecks that hinders application performance.

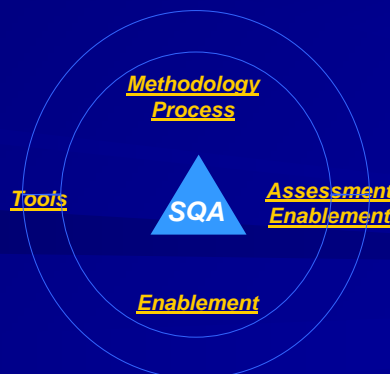

QA Process Improvement - We develop process improvement solutions that save you time and money. We identify the appropriate key process areas and best practices to improve your organizations, total cost of ownership (TCO).

Software Release Management - We select, build and manage the clients software configuration, release and test environment necessary for application stability and project predictability.

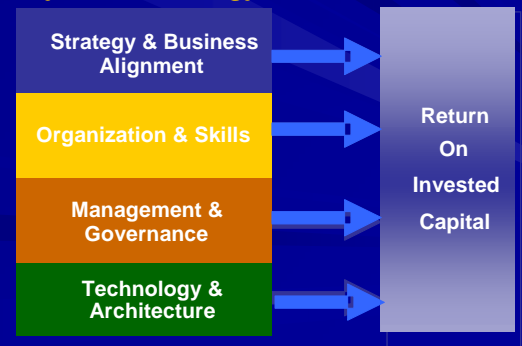

Our Client Advantage

We incorporate quality procedures so your IT development projects result in application stability, increased user satisfaction, reduced costs, faster time to market and profitability. We ensure optimum results by incorporating our proven methodologies and industry recognized guidelines with your business processes so your experience:

- ROI and Satisfied Executives
